

You've taken the first step toward glowing skin with Obagi® Blue Peel RADIANCE™

Now it's time to ensure maximum, lasting results. Blue Peel RADIANCE effectively exfoliates the uppermost damaged skin layers, leaving your skin fresh, renewed, and radiant.

While Blue Peel RADIANCE is formulated to be gentle, you may experience mild peeling and redness on your journey to revealing fresh, glowing skin. In fact, you should see noticeable results after just 1 treatment. Follow these important steps to help keep your skin protected and healthy while your peel takes effect:

STEP 1 Use sunscreen with an SPF of at least 30 at all times for at least a week. *Ideal options include: Nu-Derm® Sun Shield SPF 50, Nu-Derm Healthy Skin Protection SPF 35, Nu-Derm Physical UV Block SPF 32, or Rosaclear® Skin Balancing Sun Protection SPF 30. It is recommended that you continue to use these products to help protect your skin and maintain the benefits of the peel even after the initial week.*

STEP 2 Avoid direct sun exposure. Too much sun exposure may cause improper healing and in some cases may reverse the benefits of the peel.

STEP 3 Treat the skin gently—DO NOT exfoliate—though you may experience mildly dry, red, or flaking skin for several days or more after your peel. Do not pick at peeling skin. The dead skin will naturally slough off.

STEP 4 Avoid alpha- and beta-hydroxy acid products, retinoids, retinols, and facial products containing fragrance for a few days after the peel. Instead, use Obagi Therapeutic Moisturizer or Hydrating Complexion Corrector.

STEP 5 Please consult with your physician prior to returning to your normal skin care regimen (usually 5-7 days after application of Blue Peel RADIANCE).

Blue Peel RADIANCE may be ideal for use with other Obagi products

To gently boost glowing results, Blue Peel RADIANCE can be combined with several Obagi products for the face and décolletage, including the following:

- Nu-Derm System
- ELASTIderm® Décolletage System
- Obagi-C® Rx System
- Rosaclear Skin Balancing Sun Protection SPF 30
- CLENZIderm M.D.™ System

Be sure to follow up with your physician

- For best results, it may be recommended to use 1 peel every 2-4 weeks, for a total series of 4-6 peels
- Ask about other Obagi products that can help you get the most out of your treatment

Be sure to talk to your physician if you have any questions or concerns throughout the course of this treatment.
